Overview

No detail was overlooked in this beautifully built single family home. This 4 bedroom, 3 full bath home is almost complete. The home features coffered ceilings in the living room and primary bedroom, wood plank tile throughout all areas except the three secondary bedrooms, designer paint choices throughout, quartz countertops in the kitchen/utility and granite in the bathrooms. The kitchen features custom cabinets, a brick backsplash, built in stainless appliances and a pass-thru window to the back porch. The brick is also featured on the living room and back porch fireplaces. The primary bathroom features backlit mirrors, a large walk-in shower and a freestanding tub. Two secondary bedrooms share a jack-in jill bathroom and the other secondary bedroom has access to the third full bath. This location is only about one mile from IH-35 and it will have easy access to the brand new high school that is being built next to the neighborhood.
