Overview

Once known as the Hollister Home built in 1848, this beautifully restored 5 bed, 3 bath, 3-story is situated on a corner lot across from Haskell Park! Historic charm and modern updates are undeniable from the minute you enter into the grand foyer. Desirable stainless steel appliances, custom cabinetry, a center island, and solid surface countertops make for a dream kitchen. The main and second levels feature timeless hardwood floors. Both bathrooms have been stylishly renovated. Historic millwork paired with astounding fireplaces throughout (although non-functioning) provide a nod to the home's past and are outstanding focal points to many rooms. The third floor has two additional bedrooms and a family room. Outside, enjoy the covered front porch or partially fenced yard with patio and pergola, both perfect for outdoor relaxation. The walk-up unfinished basement provides abundant space for storage. Recently inspected and appraised, buyer has option to transfer remaining home warranty.
