Overview

This one-acre property offers a wealth of possibilities. It features two buildings with endless potential: Building 1, a 1, 620-square-foot chapel formerly used as a church, and Building 2, a 1, 165-square-foot single family building that served as an activity room and housing for the pastor, later converted into a residence. New owners have the option to use the property as a primary residence or for any purposes allowed by the zoning regulations and the City of Indian Trail. The property is being sold As Is. According to county records, the chapel was built on-site in 1975, and the doublewide home was installed in 1990.
