## Overview

The upgrades are endless, the look is timeless. This 4 bedroom, 1.5 Bath has been brought to life. Bright, Fresh and Modern is the theme throughout. The flooring, fixtures, and color combinations provide the perfect canvas to make this home your own, without having to change a thing. The stunning tilework throughout the kitchen and both bathrooms highlight this homes transformation. The flow here is seamless, starting right at the cozy enclosed porch that enters right into the large living area. The only thing better than all the updates are the gorgeous, original built in cabinets that casually offer separation between the living and dining areas. Even the large backyard was upgraded with a brand new fence. All four bedrooms and the full bathroom are upstairs, and if all that space isn't enough check out the basement. The basement has potential to be a living area of its own. It even has a custom built in entertainment area. To complete the checklist, see the garage for extra parking or storage.
