## Overview

Rich in understated elegance, this calming custom home was the Builder's own personal residence. The grand two-story foyer is illuminated in natural light from the Palladian window above and from numerous windows throughout. A striking living room is before you offering a marble fireplace with wood-insert and custom windows with sliders to an oversized deck. The level yard boasts wooded views of Upton State Park which abuts the property. To your left a vast gourmet kitchen with granite countertops, stainless appliances complete with a wine chiller and an abundance of counterspace and storage will please any chef, and the eat-in dining area nestled in a tranquil bay window flows to the sun room. A stately office and separate laundry complete this level. Upstairs there are three bedrooms including a stunning primary suite with a sitting room, luxurious bath and walk in. Thoughtfully placed windows bring the serenity of nature to every room. Lovingly maintained and updated.
