## Overview

Beautifully remodeled historic home! Home has been re-done and it really shows. All new wood-like flooring throughout the home as well as all new paint and white woodwork. Living area is bright and open. Dining size is generous and could easily double as an office. Kitchen was completely gutted and features white cabinetry, granite countertops, subway style backsplash and contemporary tiling. Both beds are a great size, one at the front of the house and the other at the back for added privacy. Bathroom has also had that same updating as the rest of the home with modern tiling that makes everything feel so bright and fresh. Large, fully fenced backyard. All this and tucked back in a neighborhood so close to Nichols Hills that the home is in Nichols Hills Elementary schools. This is such a great little home so make sure and schedule with us for your private viewing today!
