Overview

Step inside the front door and feel like you are home! This gorgeous house was totally remodeled in 2016 and offers great design tastes throughout. The sizeable kitchen is the center of attention and opens up to the rest of the rooms which includes two bedrooms, large main bathroom, laundry, dining room and living room. Vehicles and toys can be parked in the two stall garage that is just steps away. Outside, you can enjoy your morning coffee under the open porch or on the patio under the mature trees in your yard. The large corner lot includes a partial fence to keep you pets or young ones in plain view at all times. This is a great property to check out!
