Overview

Built to a breathtaking sense of scale, 10 Plum Thicket Road is a four-bedroom, four-and-two-half bath family compound whose sweeping outdoor spaces, including two screened porches, command majestic lagoon views. Set at the heart of 1.52 acres of Lowcountry solitude, the homes design connects bedrooms with a massive open living space across a glass gallery hall. The expansive open kitchen gazes out toward the screened porch with an outdoor kitchen. The primary suite enjoys a private screened porch and fireplace, with a massive en suite bath and closet. Three further suites also include a carriage home above a 2.5-car garage.
