Overview

Surrounded by mature trees, you'd never know you're only moments away from Rockport center, or all the amenities of Rockland. It feels and sounds like you're in the country. It even has a large covered porch. This extremely well cared for contemporary ranch is spacious, yet cozy. With a granite wood burning fireplace, and hard wood floors, the main living area is open concept. The primary bedroom is on one end, with another bedroom and bath at the other end of the home. The basement has a large, finished room as well as a smaller finished room that would make a great guest room. Call now for your private showing and be sure to view the 3D virtual walk thru tour.
