Overview

This stately, refreshed, waterfront Tomahawk home features pristine views and 490' of level frontage to Lake Mohawksin. A rare find, the 3BR/2BA two-story home sits on 2 parcels, and was once an area logger family's legacy estate. The craftsman style of the era has been largely retained. Original hardwood floors, a beautifully updated fireplace, large open spaces, and updated landscaping, are just a few of the qualities you will discover with this gem. The natural light is abundant in virtually every room. The lake will provide you hours of exploration, relaxation and water sport fun. Be sure to head over for the local water ski show, just a short boat ride away. Having a nice park nearby, along with the proximity to the town, while maintaining your privacy, is hard to match. This must-see property could serve as your primary residence, or an exquisite second-home getaway.
