Overview

Incredible serenity and quiet in this intimate country neighborhood of Peterfield. Single level living at its finest in this beautiful open concept, ranch home that is simply perfect for entertaining. Enter through the front and you'll be instantly captured by the hardwood floors that lead to the dining room, kitchen, and living room. The kitchen has all new stainless steel appliances, contemporary pendant lighting, granite counter tops, plenty of cabinet space, a huge center island with eat-in area, and a large pantry off the breezeway that connects to the garage. Move from here to the amazing outdoor living space with a composite deck and a three-season enclosed porch/sunroom with pine shiplap walls and ceilings. All this leading to your own onsite resort in the back yard. A gorgeous inground pool that is heated and surrounded by unique, beautiful, and professionally maintained landscaping. The floor plan inside moves from the main living space to the primary bedroom suite with custom-made tiled shower with double vanities and a large walk-in closet. Finally, a second bathroom, laundry area, and the remaining two bedrooms round out the main floor. The basement is finished with even more space for active living and fun. A newly carpeted room that has many options and even more space for family fun with a walkout to a side patio area. This home is turnkey and ready for its next chapter. Onsite sprinkler system, and standby generator too! Showings begin September

7th.
