Overview

Welcome to 800 Shadow Bluff, a highly desirable and spacious end unit tucked away at the end of the cul-de-sac in this quiet townhome community. This 2-bedroom, 2-bathroom, 2-car garage unit offers 1500 square feet of main floor living with an additional 1500 square feet of unfinished lower level for future expansion. Enter the property and immediately experience the expansive living room with large windows overlooking a beautiful, wooded area. The high ceilings add to the airiness of this space. Off the living room is a dining room and roomy kitchen with newer appliances and more views of the forests. One finds a cozy sunroom off the dining room, perfect for enjoying year-round sunlight. Down the hall is a spacious master bedroom with a walk-in closet and ensuite. The main floor includes an additional bedroom with an inviting window seat, a second full bathroom, and a laundry closet with a newer washer and gas dryer. The unfinished lower level is exceptionally clean and an open slate for expanding your living space, with room to add a bedroom, family or game room, and plumbed for a third bathroom. Newer cordless blinds are throughout most of the house, and a whole house (and garage) central vacuum system.
