Overview

Situated on a semi-private lot, this mobile home is in excellent condition and has had many improvements, making this a very comfortable place to reside! A carport in the front and the entrance through a three seasons porch offers additional privacy and indoor-outdoor living space. There is ample parking for two large vehicles and a ramp was installed for easy access into the home. The living room has a fireplace and is open to the kitchen with plenty of oak cabinets, which look custom made and relatively new. The kitchen also features an island, new Formica countertops and backsplash and a full appliance suite including the washer and dryer. There is 340 square feet of additional living space between two covered porches and a picnic table area with a privacy fence. Mature landscaping around the property is also a nice feature of the home.
