## Overview

Apache Trace is a 500 acre ranch community with lots ranging from 5 to 9 acres. It is conveniently located off of FM 479, 6 miles from Harper and 20 miles from Kerrville. The gently rolling terrain that boasts of large hardwoods, and lush native grass, is easy to get around on and offers bottom land to hilltop views. These lots are a prefect place to get back to the country, and away from the noise of the city, while still being close to all that town has to offer. The land is very livestock and horse friendly. Whether you're older and ready to slow down, or you want a place to raise your kids where they have room to roam, this is the place to build your dream home. No HOA or architectural control committee. Electricity, telephone and fiber optic will be run to each tract.
