Overview

If you listen carefully, you can hear the Saco River. This is a ranch style home situated on over 3 acres. Featuring comfortable one level living. Three bedrooms and an office too. (which could be another bedroom). The large kitchen has a dual fuel range, with a gas cooktop with two electric ovens. There's room for a kitchen table or a large island. Your oversize living room has a gas fireplace for convenient enjoyment or taking the chill off. The real surprise here is two decks with over 800 square feet of outdoor relaxation waiting for you. When you get home with the groceries you can drive directly into your garage under the house. No more hauling anything through the rain or snow! Take a look today!"
