Overview

This 100+ year old farmhouse sitting on 3.48 acres has been completely renovated over the past 3 years. The home features an open floor plan with the primary bedroom and bathroom (with an amazing soaking tub) on the main floor, new engineered hardwood flooring, a beautifully updated kitchen, and a 3 season room overlooking the beautiful property (with it's own heating and cooling system). The 4th bedroom on the main floor would make the perfect nursery, office, or exercise space. Upstairs you will find 2 more bedrooms, plus 2 bonus spaces that have endless possibilities. The sellers renovated this home with the intention to stay and live here, so the work and finishes are high quality, and no detail was left undone. Even the uncool things have been updated, including new electrical work, new plumbing throughout the entire house, and foundation repairs. The home includes a new shed with electrical connections, and a separate single garage that is perfect for storing the lawnmower and tools. This property is the perfect opportunity to be close to all the amenities and schools that Westfield has to offer, with the privacy and space of country living and no HOA. Please see the supplements for a comprehensive list of details and updates.
