Overview

This large beautiful home is located in Berkeley Lake and is a must see! The main floor is open concept and is amazing for entertaining, you have a side covered deck off the living room and is SO inviting! The gourmet kitchen has lots of cabinets, a huge island and all stainless appliances, opening to a huge deck overlooking the private, wooded yard. Upstairs has 4 large bedrooms, one has it's own ensuite bath and the other two share a jack and Jill. The primary bedroom is oversized and opens to the balcony overlooking the front yard, has a huge bathroom, fantastic his and her's closets and the most precious room that could be an office, extra closet space or a nursery. The character in this home is everywhere! The basement is everything you want, high ceilings, multiple big rooms, a flex space that's technically not a bedroom but is perfect for one, a full bath and organized storage! The icing on the cake is the TESLA solar panel system, just over a year old, this system is amazing, your power bills are pennies compared to everyone else and has a backup battery that stores power to ensure even in the worst storms when your neighbors don't have power, you'll have all the power you need. Don't miss this one, these features don't come around often wrapped in one single home!
