Overview

Situated on a premier lot in the highly desirable Villas at Whistlestop stand-alone condo community, you're sure to fall in love with the balance between the ease of ownership offered by condo life alongside the privacy of a single-family home. Designed and built by DK Homes, you'll find custom features and carpentry throughout every room of this zero-step entry home. Featuring a primary suite with 36" doors, heated bathroom floor, roll in shower and elegant soaker tub. Kitchen with custom range hood and matching island table, quartz tops, walk-in pantry and vaulted ceiling. The 36'x27' three stall garage offers an epoxy floor with drain and natural gas heater. Relax on the main floor screened-in porch with ceiling fan, tv hookup and a private, wooded view. Custom mudroom, laundry, half bath and office round out the main floor. The basement landing opens to a slider door, bringing you to the multi-level side patio, flower garden and expansive back yard. The open basement offers a family room, wet bar, additional bedroom and full bath with options to easily add up to two additional bedrooms. One of the most unique features of this home is the wine room, where a commercial sink and custom built rolling table offered an excellent space for making wine. Yet this space was built specifically to allow for easy conversion to a bedroom, workout room or

office. Villas at Whistlestop is neatly nestled between M6 for easy highway access and both Whistlestop Park and Downtown Byron Center for easy, paved walkability. This condo community was constructed in a single phase with 29 units, all of which are stand-alone. Dogs are allowed, and there is a paved walking trail at the end of the development that connects to the trails at Whistlestop Park.
