Overview

This property is a gem, offering both expansive views and a versatile layout. On over 1.5 acres, there's plenty of space for a variety of uses. The back upper deck and lower patio are perfect for relaxing and entertaining. Hot tub, and enclosed workshop down below, and a spacious lower level interior with additional amenities makes it quite unique. The updated kitchen with granite countertops and custom wooden cabinets with stained glass adds a touch of luxury. Two car garage offers convenience and easy access into home during inclement weather. Its certainly a rare find to have such a large lot within town limits, offering both the tranquility of nature and the convenience of urban living. This property could appeal to a wide range of buyers, with a lower level that might make a great second living area with separate entrance. Its possible the lot may be split (check with planning and zoning) or build a guest home, granny flat or have space for your RV..... so many options.
