Overview

You can't appreciate the space and layout of this home without actually getting inside and seeing it for yourself! Adorned with plenty of natural light, you'll appreciate the openness of the foyer when you walk in the front door. The kitchen with solid surface counters is large and has plenty of work space and cabinets. Main floor laundry and 1/2 bath off the garage entry is convenient. There's plenty of room on the main level to spread out and the upstairs is nicely laid out so everyone can feel like they have room to move around without bumping into one another. The primary bedroom has two generous closets and an additional large storage closet in the en suite bathroom. In the basement, you'll find a large rec room, wet bar, light-filled bedroom, a full bath and even more living space (in an L-shape that adds an additional 206 square feet.) Enjoy the patio off the walk-out basement or the deck off the family room on the main level. Mature trees offer privacy and a shed in the backyard make this a very relaxing and useful outdoor space. Siding and roof new in 2020. Carpet in 2022. 1/2 bath has new floor, vanity and faucet. Primary bath has new vanities, faucets and lights. New washer.
