Overview

Absolutely beautiful home in the much loved Countryside neighborhood. This one has the kitchen you've been dreaming about! Wraparound granite countertops, an island, and another countertop with bar seating and even more storage; there's even a great corner pantry! Open concept with great views into the family room, through the dining room and out to the great backyard! This awesome lot backs up to a drainage easement which feels like having a whole other yard to run and play in but without any upkeep! Awesome backyard includes a patio and a fire pit. The upstairs primary suite is so big it has room for a whole other living space or throw in a desk! The suite is complete with a beautiful tiled shower, tiled floors, a walk-in closet, and more granite countertops on the sink. Two more bedrooms, a loft for living or working, and the conveniently located laundry completes the upstairs. Did I forget to mention the Pool?? The great Countryside includes a community pool, basketball and tennis courts, fishable ponds, and lots of trails. Visit today!
