Overview

This large contemporary Bank Owned property is a diamond in the rough just waiting for it's next owners! Situated at the top of the road with stunning views. The 18.50 acre property features a circular driveway, a large pond, beautiful views, a one-car or equipment garage as you enter the property, and 1000' road frontage on NY-30 at the base of the property. The home consists of two bedrooms, one of which is an owners suite with a sitting room, bedroom, and bathroom with jetted tub. Adjoining the house is a second large building with extensive framing that could be more living space, a home business, a large recreational space. The potential is only limited by the imagination! Bring your tools or your contractor and transform this space into the shining gem that it can be! More interior photos coming soon.
