Overview

Take a look at this three bedroom home and all of the space it has to offer. Step inside to see a beautifully redone kitchen and living area. Laundry is conveniently located on the main level along with a full bathroom. The front room could be used for a formal dining area or a second family room. All of the large bedrooms are located upstairs making this home perfect for hosting company and having gatherings on the main level. The cement basement has enough room that it has been used as an in home gym. Do you like spending time outdoors? The large, fenced backyard leaves nothing to be desired. Enjoy a quiet dinner outside on the back deck or host a cookout. There is plenty of room for both.
