## Overview

This solid farmhouse has been taken down to the bare bones and framed back for a large open floor plan with 212 sqft of living, dining, and kitchen. Use your imagination to complete the project to your own taste or style. Low-E windows, newly installed, will help keep utility bills lower. After leveling the floors, a good solid foundation has been established. Current owner has some materials purchased to complete the job. A new aerobic septic, new 200 AMP electric panel, and several water spigots (throughout the one acre) also come with the property. Park your RV on a new slab with a 50AMP plug and sewer hookup. Seller's RV will not convey. A great place where you'll find a blank slate ready for your personal touch!
