Overview

Super 4 bedroom home on 1.50 acres of land. This home has a great floor plan. Needs a little bit to finish off the remodel job. Has a nice size kitchen with island seating area and a dinette eating area. The kitchen is open to the living room. The main floor offers two bedrooms, and a laundry room with plenty of space to add in cabinets for additional storage. The second floor offers two bedrooms and a 10 x 7 bath. Currently used as a half bath, this room offers plenty of space to add a great walk-in shower or adding in a great soaker tub. The two car garage is 40 feet deep offering plenty of room for additional cars or use the additional back space for a work shop. The unique back yard deck is partially covered and a great place to relax. The additional building in the backyard is the seller's pride and joy. It is his man cave. A perfect place for entertaining for the next owners to enjoy. The entrance offers an outside covered seating area and a fire pit. The glass doors facing the back offers a magnificent view of the back acreage up to the cornfield. There is also a patio at these glass doors currently covered with a bit of greenery that can easily be removed to expose the patio area that can offer an additional entertainment space. This property is a must see to appreciate it.
