Overview

This newly constructed, never-lived-in home offers unparalleled durability and energy efficiency. Engineered with pre-stressed insulated panels that are 98 tall and 8 inches thick, this property is both fire and hurricane proof, offering superior resilience and peace of mind. These panels feature 2 inches of concrete on both sides, ensuring exceptional strength and insulation, making the home extremely energy efficient and structurally sound. High-end finishes are evident throughout the home, including custom cabinets made locally, a Quiet Cool system for efficient cooling, and radiant heated flooring for optimal comfort. The roof construction includes steel purlins and six inches of insulation, all covered by a standing seam roof designed to withstand the elements, further enhancing the homes durability. The homes open-concept layout includes 3 bedrooms, a bonus room/office, 2 full baths, and 2 half baths, catering to modern living needs. The detached garage features shop space, a half bath on the lower level, and an unfinished loft above, providing additional flexibility and storage options. Situated in a quiet cul-de-sac, this home offers not only advanced construction methods and superior materials but also a safe and serene environment for comfortable living. This home was featured on Industry Today and Home Improvement and Repairs and Building Savvy Magazine. Make this incredible home yours today!!
