Overview

The Whispering Meadows Ranch has 1,085.23 feet of frontage on Beasley West End Road. The rear boundary of the ranch is formed by Snake Creek. The property has good perimeter and cross fencing. It includes a central all-weather driveway and there is a concrete low water crossing at the creek. There is a water well and a 2,800 sf Mueller brand metal building (2012) that includes 1,600 sf of enclosed shop space and 1,200 sf of covered (open-sided) storage space. There is a good set of livestock pens and multiple water troughs for livestock. This is in a growth corridor of Fort Bend County and this is a great investment and development property. It includes some floodplain area near its rear boundary along the path of Snake Creek. Overall this is a very attractive property that is just north of Beasley and in the direct path of Fort Bend County's western growth. A portion of this property is within the city of Rosenberg, but there is currently no tax from the city.
