Overview

Another great low maintenance, single level home to be built by Taylored Elements Construction in the West Village subdivision which is just .8 of a mile from downtown Ashland. It's built to Earth Advantage standards with green features and energy efficiency including solar panels, EV charger in the 2 car garage and ductless heating and cooling system. This 3 bedroom, 2 bathroom single level home will have a gas fireplace in the living room, lots of windows for abundant natural light, engineered hardwood floors in main living areas, carpet in bedrooms, tile floors in bathroom and laundry room, quartz countertops and custom cabinets with soft close drawers. The home has a front porch and back patio plus the yard is fully landscaped with drip irrigation and side to back yard 6 foot fencing. Estimated completion in 2024. See attached map for other lot/build package availability. Property taxes will be established upon completion.
