Overview

Welcome to your 12, 000+/-acre Antelope Cattle Ranch, featuring extensively developed roads, springs, ponds, and watering holes that ensure easy movement from grazing to water. The predominantly gradual rolling grassland terrain and nearly 575 acres tillable/hayed ground supports a gentle and easily managed 450 cow-calf herd. These water sources, along with meadows and protected canyons, not only benefit the cattle but also create an ideal habitat for the thriving elk, deer, antelope and chukar populations.
