Overview

Welcome home! This home has been completely remodeled all throughout!! Believe me, this place is DROP. DEAD. GORGEOUS. (kinda like you) The kitchen is COMPLETELY brand new! Butcher block counter tops all around with an island topped with your concrete countertop. All appliances are brand new in the kitchen as well! The primary bedroom, right on the first floor, has a fantastic walk-in closet along with the coolest bathroom as well! The bathroom vanity was custom made from an antique dresser!! Another 2 bedrooms are right up the stairs along with another full bathroom and an awesome loft that could also be used as a 4th bedroom! Everything from head to toe has been touched in the last 3 years! Look for the attached document of everything that has been done here! Outside, you'll have a space for your vehicles in the 2 car garage. Don't forget the 70x40 BARN! This barn has 200 amp service for everything you'd like to do! Walk up the stairs of the barn and you'll find a loft up there as well! With 5 acres you have all the space, inside and outside, that you would ever need! Come see this house today!
