Overview

Beautiful setting with large open area, tall pines, trails, building sites and a few older buildings that add character or continual use for storage or guest house. The main house, septic and well are at the site, house is NOT safe, it is a tear down. Do Not Enter. Septic and well are unknown, no reports found at the county for either. Buyers responsibility to abandonment of septic system. The building sites and locations are wonderful. Trails around the property, field in the back. There is an older guest cabin they still use and a garage they still use. There is power to the pole and the camper uses the water from the well. Great location for your dream home. Close to snowmobile trails, Superior Hiking trail and Lake Superior is short distance.
