Overview

This Jackson gem you will want to see in person as the pictures don't quite do it justice. The home is conveniently located less than 2 miles from Jackson Village loop and less than 10 miles from Mount Washington and Wildcat Ski Area. This southern facing home is a corner, wooded lot that has access to the Loop Trail, part of the Simone Preserve, which is conservation land managed by the Upper Saco Valley Land Trust. After your hike you can relax in the hot tub or enjoy a drink by the fire pit or stream. Invite your family or friends as the house can sleep a crowd with its four bedrooms and additional den. The main level features a nice sized living and dining area off of the kitchen, along with a deck for grilling and covered screen porch to enjoy your meals outdoors bug free. There are also two bedrooms on the first floor along with a full bathroom. A finished family room in the basement allows for additional space for relaxing and entertaining. The second floor features a third bedroom and a den / office space, along with a 3/4 bath. Up one more flight of stairs you will find the 4th bedroom, that also has access to an additional finished space that can be used for storage or a sleeping area for children. In the winter you have the choice of using a propane or wood furnace. And on those chilling nights you can also enjoy the wood fireplace in the living room. Showings

begin Friday, August 16, 2024.
