## Overview

One-of-a-kind stone home on Lake Adger. Custom hand-built in the Pennsylvania Farm style, this unique home offers a low-maintenance simple floor plan that encompasses an artful blend of cherry hardwood and African mahogany. Terraced gardens provide ample space for a variety of existing fruit trees, which include apple, peach, pear, cherry, figs, blueberries and more, and are safely ensconced in custom iron fencing and gates. An inviting covered front porch, and screened-in area grace the front of the home. A slate roof and copper soffits and gutters add to the long life and easy maintenance of the exterior. The spacious kitchen has granite countertops, custom handmade cherry cabinets, a professional BlueStar gas range and oven, a custom-made stainless-steel sink and 1/2 bath. A stone, 2-car garage at the top of the concrete drive offers an abundance of storage possibilities. An easy path leads to the waterfront and dock. A deck nearby is complete with electric, lights, and outdoor shower.
