Overview

This 2 bedroom , 2bath home is located on 5 acres. The home is very clean and in good condition. It has an approx. 2500 square ft. commercial grade shop on the property that was previously operated as an automotive repair shop. This building is in great condition. It is a metal building that is insulated, has a lean to, plumbed for compressed air, completely wired, and it has a small office and a bathroom. It would be a great place for a shop or some other kind of business to locate. A second shop that is a 30x20 with concrete floor is also on the property. There are 3 wells and septic tanks on the property. One of them is on the back of the property where a mobile home used to be located. The property is quiet but would still be an easy commute to Warner Robins, Hawkinsville, or Cochran.
