Overview

Tucked in the Berkshires of Western Massachusetts, this Williamstown contemporary boasts over 7,000 sq. ft. of undeniable form and function mixed with the highest degree of finishes. It's been said that homes can be duplicated anywhere, but a setting with unique and rare attributes cannot. Gently Sited amidst a spectacular 34-acre backdrop bordering 8,000 +/- acres of protected land is incredibly rare. Architecturally designed to contour with the natural topography of the site greatly reduced disturbance when built. This multi-tiered footprint affords picturesque sunset views of the village below and Berkshire hills beyond. Watch a soccer game at Cole field from your Gunite pool, walk to the village for dinner or go hiking on Chestnut/Pine Cobble Trails right off your property...
