Overview

In the quaint little town of Denver, as you head into the borough on Main, you'll find something truly special. As you enter through the double doors, you'll be faced with an open concept living and kitchen area. Above you'll see the open ceiling with studio lighting that has a kind of modern, industrial style. The kitchen has a drop ceiling with counter tops that sport waterfall edges and above the island hang the comely pendant lights. Throughout the home you'll see the New York style exposed brick and within each room on the wall you'll have a heating and air conditioning unit. The bathroom is spacious and inviting with his and hers sinks, a tub for those long days where you just want to take a bath and a convenient walk-in shower with varying functions such as the rain shower head. This is a three-story house with five private bedrooms and three private parking spaces in the back.
