Overview

Welcome home to my unique escape into nature! I feature a towering canopy of trees including Burr Oaks and Shagbark Hickories that provide comfortable living for many birds. Many animals enjoy the fresh water creek that runs through my yard too. A tri-level craftsman home with a vaulted upper level ceiling, two wood burning fire places, a walk-out deck from the upper level, a walk-out patio from the lower level, jetted bathtub, three bedrooms and two bathrooms stands steadfast on my 1.51 acres. Lets not forget the two walls of windows that allow the morning sun to shine through and you to observe the nature land provides. Owl sighting and wonderful living awaits! (Written from the perspective of the property)
