Overview

Are you looking of the right place to build that is away from everyone or to be able to have a place to hunt that is just yours? Perhaps you want to be off the grid! This great parcel of land is located on a class VI road, but is quiet and away from it all with wildlife all around you. Snowmobile trails just right outside your door or if you like to take walks in the woods, you will really enjoy what this lot has to offer. The Chadwick Grist Mill used to be on this property with a stone foundation still located on the lot as well as an old cold stone well. With 961 feet of road frontage there is also a possibility to sub-divide. Buyers to do their own due diligence to check on zoning requirements to build.
