Overview

Take a look at this charming 3-bedroom, 1-bath home that has been thoughtfully renovated and is ready for move-in. The spacious living area opens up to a huge kitchen, making it the heart of the home. This kitchen stands out with its beautiful cabinetry, large butcher block island, and stainless steel appliances, making it ideal for both cooking and entertaining. The primary bedroom offers ample space and is conveniently situated close to the bathroom, providing easy access. Across the home, the two guest bedrooms are nicely separated from the primary, ideal for family or visitors, adding an element of privacy to the layout. Outside, the home features a LG backyard complete with an above-ground pool and expansive deck, perfect for barbecues and pool parties. A privacy fence surrounds the property, providing security and seclusion, while an attached storage building adds practicality. A new roof installed in July 2024 and fresh exterior paint enhance the home's value and curb appeal.
