Overview

They say Location, Location, Location is the key to a great home. Well this one is a great place with an outstanding location. Tucked back in a private area with open space all around, this 2 Bedroom Townhome with a lookout full basement is perfect. Great kitchen space along with a dining area with a slider to the deck as well as a living room with a fireplace. The entire first floor is open and flowing. The 2nd floor has 2 bedrooms and a loft. The basement is a blank slate however with the look out windows there is so much natural light. And the bonus is a parking lot belonging to the homeowners is right next door so there is plenty of parking. Come see this one today. You will see why I love this home.
