Overview

Incredible custom built home overlooking the main body of the lake. Enjoy the incredible view from your covered, private back porch or get a better look by going down to the private boat dock and enjoy the summer breeze with friends on the large upper deck of the dock. This beautiful home has 5 bedrooms and an additional office. Custom granite countertops throughout the house with beautiful copper accents. The entire upstairs is one large room with a full bathroom and a large walk-in closet. There are two large, waterfront lots adjacent to the house, along with two more lots and a huge shop directly across the street. The shop has covered parking and two large roll up doors for even your biggest toys. The gated community of Oak Point is a beautiful refuge close to the city with the lake life reality. No details or expenses were spared in the building of this home. The two additional lakefront lots could be sold as the home lot is so large.
