Overview

Rarely available 4 bedroom condo in Oak Park! This unit is a spacious top-floor condo in a 3-flat with original woodwork and beautiful hardwood floors. Nestled among the trees on the second floor, this unit gets tons of natural light and no footsteps above you! Leave your shoes and bags in the private foyer just outside the door and enter the unit to find a large living room and separate dining room flanked with windows. The front bedroom is often used as an office space overlooking the street. The 4 bedrooms are generous and bright. The large white kitchen has new flooring(2023), and ample cabinet space. Off of the kitchen, the enclosed back porch is big enough to house the newer full-sized washer/dryer(2021)and more versatile space for office, eating, or play area. Association will allow for addition of another bathroom in this large unit. Great closets and storage within the unit and more storage in the basement, where there is also a common gym for owners. Enjoy the open front porch and fenced rear yard. One deeded garage spot included. Small, intimate, self-managed building means low assessments (\$200/mo.). Great alternative to detached house living with the best of all worlds. Lincoln Elementary School area. Conveniently located near schools, parks, blue line, restaurants and shopping.
