\$343,000

Overview

MOTIVATED SELLER -- BRING YOUR OFFERS! This property is two lots totaling 4.62 acres which offers its new owners a number of options from building homes on each lot, to building one one of the lots while keeping the other for privacy, to having your builder re-plot the lots as one so you can build over the current setback lines. Between the size of the property, the beautiful oak trees, and the rear lot line that is shared with a private property, this piece of the Hill Country is the most secluded in Belle Oaks. Ownership of this property provides the unique opportunity to live in a desirable community where you can take advantage of the neighborhood amenities, take walks along paved streets and get to know your neighbors, then retire to the privacy of your property to recharge. Make sure to take a moment to view the attached video to get a feel for the land, then have your agent schedule a walk through. I'll be happy to lead you all on a tour!
