Overview

Only a half a mile drive from I75 exit 439 lies your next adventure. 18.95 acres of Plantation style select cut pines that tower over a beautiful piece of North Florida. The front of the property with a little work has residential and building potential. The rest of the property has been left natural and is housing quite a bit of wildlife. Being located in the Northern most part of Suwannee County and having tons of deer sign throughout the property, this place has the potential grow and produce quality North Florida and South Georgia Bloodline Whitetail Bucks. The western portion of the property drops in elevation into a dense thicket making the perfect transition from a grazing area to bedding area all on one piece of ground. The more you walk the more you find on this place, mazes of deer trails that are littered with buck rubs, water oaks, Live oaks and Persimmon trees as well.
