Overview

Welcome to your new home in Conshohocken! Located near the corner of a quiet street, this Twin home sits on an oversized lot and features 3 bedrooms and 2.5 bathrooms. With only the elementary school at the end of the street, there's typically less through traffic and, because of the school, the road is usually one of the first to be plowed when it snows. Lovingly-maintained by the current owner, the home has seen numerous upgrades over the years including basement waterproofing and bathroom added, deck addition, kitchen and bath remodeling, and front porch work and exterior painting. The home's main level features the living room, open kitchen/dining area with breakfast counter and room for a table, and laundry room/half bath at the back of the house. Upstairs, you'll find the owner's suite with walk-in closet and ensuite bath, and guest bedroom. A finished walk-up attic provides the remaining bedroom. The unfinished basement offers plentiful storage and a second full bath with stall shower. Outside, there's a covered front porch and rear deck for relaxing outside with family and friends. The large yard provides plenty of room to enjoy and includes a shed for additional storage. Driveway and on-street parking. Conveniently located close to multiple shopping centers and major roadways for ease of commuting. If you're home shopping in the area, be sure to add this one to your list!
