## Overview

This adorable rock and cedar country home is situated on 6 flat acres with everything you'd want for horses, livestock, or your own hobby farm! It's private, with a sense of seclusion and nature, yet minutes to Fayetteville. When you pull into the driveway, the wood gates open/close with an opener. Once inside, the home is full of natural light and openness. The huge master bedroom and bath were built in 2022. The master closet is an absolute dream with built-ins and pull-out drawers. A walk-in closet? How about a walk-through closet! Step out of your bedroom and onto the covered back porch to drink your morning coffee - or stay in bed a little longer and enjoy the cozy, electric fireplace. In the kitchen, the dishwasher and stove are 2 years old and you will love the cast iron with porcelain enamel double farm sink. Outside, get some work done in the 30 x 40 workshop complete with 220. There is also a 2-stall barn with a tack room and foaling shed. This is a fabulous piece of property that you don't want to miss!
