Overview

Live the life you've always dreamed of in this luxurious home, tucked away on 10 acres. This potentially income producing property is less than ten miles from Downtown Pinehurst and the Pinehurst Country Club, and there's no HOA! It's all about the details in this spectacular home which boasts richly upgraded materials such as imported Italian doors, natural stone floor tiles, and Pella windows. Vaulted ceilings in the kitchen and living room allow for an abundance of light and beautiful views of the lush backyard, a portion of which is fully fenced. The styling leans toward classic, but modern conveniences abound including a built-in surround sound system, a whole-home security system, plus double ovens and a walk-in pantry that complement the well appointed kitchen space. This well maintained home also includes multiple eco-friendly features such as tankless water heaters, vapor barrier in the crawl space, and attic insulation that also serves as pest repellent. There are three separate HVAC units, perfect for customizing climates in different areas of the property. Two full bathrooms are well thought out with generous tile showers and custom closets. The primary en suite bathroom serves as your own private escape with its elegant lighting, deep soaking tub, and two separate walk-in closets. Let's not forget the guest home, beautifully attached to the

main home by a columned porte cochere. The possibilities are endless for this independent living space equipped not only with two full bathrooms, but also with its own kitchenette as well as laundry area. This gorgeous property is also approved for equestrian use. Most of the parcel is cleared and ready to be transformed into a tranquil horse farm. All aspects of this extraordinary property are connected to a generator served by a 1000 gal buried propane tank. There are truly too many features and possibilities to list. Book your private showing today!
