Overview

Custom built, all brick ranch backing to Locust Hills Golf Course on 1.22 acre cul-de-sac lot. The kitchen has cherry wood cabinets and granite counter tops. The great room has a gas brick fireplace with an open brick chimney illustrating the executive style of the home. There is another gas fireplace with open chimney in the lower level. The Brazilian hardwood floors and vaulted ceilings carry through from the foyer, dining room and great room. The master suite has a private doorway to the covered back patio plus a tray ceiling design. Double vanity, jetted tub, separate shower and double walk-in closets round out the primary bath. The three car side-load garage allows for great curb appeal and side garage loading. This lower level has experienced some water damage to the finished areas, believed to be from a sump pump failure. The landscaping does need some attention and lower level remodel. Price reflects the necessary work. All agents and clients to sign hold harmless.
